Re: Baldwin Power Plant – Annual Progress Report to the Notice of Planned Participation to Achieve Permanent Cessation; NPDES Permit (IL0000043)

Dear Mr. LeCrone:

On January 29, 2021, Dynergy Midwest Generation, LLC (DMG) submitted a notice of planned participation (NOPP) to the Illinois Environmental Protection Agency (IEPA), demonstrating that the Baldwin Power Plant's Units 1 and 2 qualify as electric generating units that will achieve permanent cessation of coal combustion no later than December 31, 2028. Pursuant to 40 C.F.R. § 423.19(f)(3), DMG submits this annual progress report.

On November 30, 2020, DMG submitted a no alternative disposal capacity demonstration under 40 C.F.R. § 257.103(f)(2) to both USEPA and IEPA that requested an extension of the deadline to cease receipt of waste in the Baldwin Ash Pond based on the company's announced plans to retire the Baldwin Power Plant. Consistent with the actions and timeline detailed in that demonstration, DMG has completed the following actions since the previous progress report submitted on December 20, 2022:

- Prepared and submitted to IEPA, on July 31, 2023, a closure construction permit application, as required under 35 IAC Part 845.

Upon IEPA permit approval and issuance, DMG will proceed with the other action items detailed in the revised alternative closure demonstration.

If you have any questions regarding this submittal, please contact Mr. Phil Morris at 618-606-7788 or phil.morris@vistracorp.com.

Sincerely,
Dynegy Midwest Generation, LLC – Baldwin Power Plant
